## About me

Motivated junior software developer relocating to France and seeking a full-time opportunity to leverage my Javascript and React knowledge. I am a problem solver with a passion for learning new skills and a desire to adopt the best practices of a professional team. After 7 years as an accomplished Event Manager, I developed excellent project management skills and am now seeking to transition my career to the Tech Industry.

## Projects

### vportier.com

First iteration of my personal website built with React and hosted on Netlify.

### Toudo

Toudo is a web app that helps you organize your life. You can create tasks, schedule, prioritise, sort, file and comment on them. Toudo manages authentication and saves your tasks in Firebase. Toudo uses custom hooks to make firebase calls and set the context of the app with your tasks and projects.

*Technologies: React, HTML, CSS, Firebase, React Router, Hooks and Context*

### The Resistance: Avalon game

This web app is an adaptation of the game The Resistance: Avalon. I used object oriented programming to define the rules of the game and conditional rendering to update the DOM and progress the game based on the players decisions.

*Technologies: React, HTML, CSS, React Router*

### FreeCodeCamp certification projects

Each FreeCodeCamp certification requires to complete 5 projects to finalise the course. I have built 15 projects, including static webpages, a random quote generator, a pomodoro clock, a calculator, a markdown text editor and a drum-machine.

*Technologies: HTML, CSS, Javascript, React, Redux*

## Professional Experience

### Senior Event Manager @ AusBiotech

Jun 2016 - Apr 2020 // Melbourne, Australia

Fully managed logistics, operations and sponsorship sales of two major international conferences generating over \$1 million profit

- Proposed and managed the transfer of 5 websites to a new CMS
- Redesigned and maintained the content of websites using HTML and CSS
- Managed our online registration system using an Event Management Platform and created dashboards to track and monitor our performance
- Worked closely with a provider to build and implement a Business Matching solution that led to 4000 facilitated meetings
- Communicated and collaborated with multi-disciplinary teams of providers, clients, and stakeholders on a daily basis
- Designed weekly marketing email campaigns in HTML

### Event & Communication Manager @ Ifaci

Apr 2013 - Jan 2016 // Paris, France

- Closely collaborated with a digital agency to design, develop and implement a custom registration platform for our International Conference (2000 delegates)
- Interfaced with designers and management team to develop, document, and manage the conference's marketing website
- Helped solidify a brand direction for our events to span across print and web

### Event & Sponsorship coordinator @ Canal+

Aug 2010 - Aug 2011 // Paris, France

- Contributed extensively to the PR strategy of the Winter X Games Europe and to the management of the partners.

## Skills

### Programming languages

JavaScript, HTML, CSS/Sass

### Libraries & frameworks

React, React Router, React Redux, Moment.js, Material-UI

### Tools & platforms

Git, Firebase, Netlify, Squarespace, Lightroom, Photoshop

### Soft skills

Self-drive to learn, Project management, Teamwork, Customer service

### Languages

French (native), English (fluent)

### Currently learning

Node, Express MongoDB and Mongoose

## Education

### FreeCodeCamp Curriculum

2020 // Online

I completed 3 certifications:

- Responsive Web Design
- JavaScript Algorithms and Data Structures
- Front End Libraries

### Grenoble EM

2008-2012 // Grenoble, France

Master's degree in Management  
Volunteered in the school's Students Union for 2 years

### University of Alberta

2012 // Edmonton, Canada
